Family Housing

Helping families to help themselves

The program

The Family Housing Program is a supported accommodation service for families who are at risk of homelessness. The Family Housing Program is able to provide supported accommodation to families who wish to actively engage in a support plan whilst being housed for up to 12 months.

A Housing Support Worker visits the family regularly and works alongside the family to develop a support plan that is appropriate to the family's strengths, needs and goals.

Housing Support Workers assist with:

- Advocacy and referral
- Budgeting
- Tenancy skills
- Links to employment, education & training
- Transition to independent long term housing
- Support to link in with the community

The service has properties located across the metropolitan area. Most of the properties are three and four bedroom homes, close to schools and community facilities including public transport.

Eligibility

Families who are at risk of homelessness will be accepted on the Family Housing Waiting List.

**We will work with you
to find a solution that
suits your family**

Families must have:

- A support need relating to maintaining and sustaining a tenancy
- Two or more children under the age of 16, in their care
- A willingness to actively engage in a support plan
- Eligible for the bond assistance loan and on the Housing Authority Waitlist

Referral Process

Agencies who wish to refer eligible clients to Family Housing can advise them to call the Family Housing Enquiry Line on 08 9528 0735.

An over the phone assessment will be conducted and eligible families will be accepted onto the waiting list.

Waiting List

To remain current on the Family Housing Waiting List all families are required to contact the service fortnightly.

During periods of high demand, the waiting list may be closed to new applicants.

Housing Process

A two-phase interview process is conducted with families prior to being housed. When a family is offered accommodation they are required to sign a lease and pay a bond. Rent is based on household income and must be paid via automatic deduction (e.g. Centrepay).
