

## Our work made a great impact in 2016.

This was possible due to the support of our passionate staff, volunteers, corporate, philanthropic and government partners, as well as the many Western Australians who gave so generously.

We currently provide 85 different service types in almost 50 locations throughout WA, and these services are in high demand. We continually strive for innovative solutions to continue the important work we do with so many children, young people, individuals, families and communities.

Let us show you some of the ways that we have been able to make an impact on the Western Australian community.
